Beyond the Ring: The Evolution of the Doorbell

1

Traditional Doorbell

A simple chime. No visitor identification, no recording, no awareness.

2

Early Video Doorbells

Basic live feed and limited alerts — but still reactive, not intelligent.

3

Smart AI Doorbells

Facial recognition, personalized alerts, and seamless automation for modern living.

Increased urban living, remote work, and the demand for constant awareness have accelerated the need for smarter security.

THE CORE TECHNOLOGY

The Game Changer: Facial Recognition Arrives

Advanced AI analyzes facial features at your doorstep and compares them against a database of known individuals — in real time.

Personalized Alerts

Know exactly who's visiting, not just that someone is there.

Enhanced Security

Distinguishes familiar faces from strangers automatically.

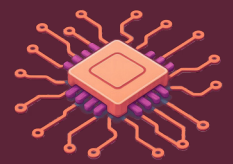
PRODUCT SPOTLIGHT

Aqara G4: Local AI for Privacy and Automation

1080p HD Video

Crystal-clear visuals day and night with infrared night vision.

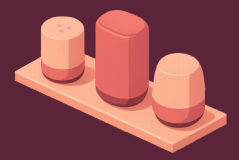


On-Device AI

Facial recognition runs locally — faster response, full privacy, no cloud dependency.

Automation Triggers

Activate "welcome home" scenes or play messages for specific visitors like the postman.



Ecosystem Integration

Works seamlessly with Apple Home, Alexa, Google Home, and Aqara Home.

PRODUCT SPOTLIGHT

Eufy: Intelligent Recognition for Unparalleled Safety

Facial Recognition Database

Recognizes familiar faces and instantly alerts you to unusual or unrecognized activity.

Machine Learning

Continuously improves accuracy over time — the more it sees, the smarter it gets.

Privacy-First Design

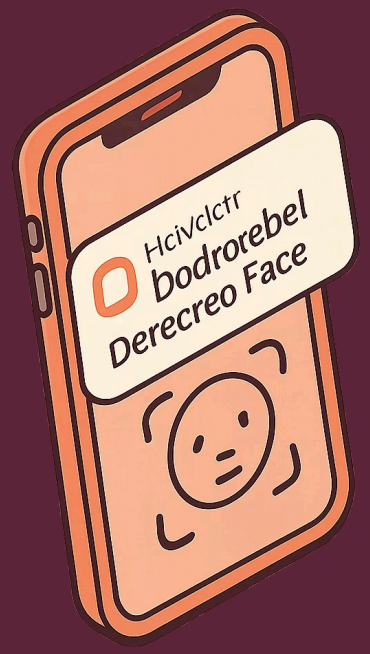
Choose models with local processing for personalized notifications without cloud dependency.

Made with GAMMA

APPLE ECOSYSTEM

Apple HomeKit Secure Video

Apple's HomeKit Secure Video brings facial recognition directly into the Home app — no third-party subscriptions required.



1 Home App Notifications

Get alerts on your iPhone when recognized individuals are detected.

2 Photo Library Integration

Uses your existing photos or captures recent visitors to build the recognition database.

3 Customizable Access

Control who can use your photo library: Never, Only Me, or Everyone in the Home.

FOR BUILDERS & MAKERS

IoT-Based Systems: DIY and Cost-Effective Solutions

Hardware

Raspberry Pi or ESP32-CAM setup

Vision

Local face detection and processing

Cloud Alerts

Send Telegram or Blynk notifications

Remote Control

Unlock/lock the door remotely

Open-source platforms like Raspberry Pi and ESP32-CAM combine local computer vision with cloud messaging to deliver real-time photo alerts and remote door control — all at a fraction of commercial costs.

Key Features for Advanced Smart Doorbells

High-Definition Camera

Clear video quality, even in low light or at night.

Two-Way Audio

Speak with visitors remotely in real time.

Package Detection

Differentiates between people and delivered packages.

Activity Zones

Customize motion detection areas to reduce false alerts.

Mobile Alerts

Instant notifications sent directly to your smartphone.

Made with GAMMA

The Impact: Enhanced Security and Convenience

24/7

Always-On Awareness

Know who's at your door, even when you're away.

3x

Faster Response

On-device AI delivers alerts faster than cloud-based systems.

0

False Alarms

Activity zones and facial recognition dramatically reduce unwanted notifications.

🔒 Deterrence

Visible smart technology discourages potential intruders before they act.

⚡ Efficiency

Streamlined access control and automated visitor management save time.

🏠 Personalization

Tailored alerts and home automation create a truly smart home experience.

Made with GAMMA

The Future is Smart: Your Doorway, Reimagined

Smart doorbells with facial recognition are no longer a luxury — they are a vital component of modern home security and connected living.

Stay Connected

Monitor your home from anywhere, at any time, on any device.

Embrace Intelligence

Let AI handle recognition, alerts, and automation so you don't have to.

Protect What Matters

Upgrade your home's first line of defense with the technology it deserves.
